

chromatin organization
Metabolism of lipids
microtubule cytoskeleton organization
lipid biosynthetic process
DNA damage response
response to hormone
positive regulation of organelle organization
phosphorylation
regulation of small molecule metabolic process
monocarboxylic acid metabolic process
regulation of cellular catabolic process
RNA biosynthetic process
Signaling by Rho GTPases, Miro GTPases and RHOE
regulation of DNA metabolic process
organelle localization
protein localization to organelle
Angiopoietin like protein 8 regulatory pathway
Epigenetic regulation of gene expression
Organelle biogenesis and maintenance
mRNA metabolic process
