ZT0 Tg−ALF vs Tg−TRF
activated
suppressed
Systemic lupus erythematosus − Mus musculus (house mouse)
Type I diabetes mellitus − Mus musculus (house mouse)
Hematopoietic cell lineage − Mus musculus (house mouse)
Graft−versus−host disease − Mus musculus (house mouse)
Inflammatory bowel disease − Mus musculus (house mouse)
Allograft rejection − Mus musculus (house mouse)
Cell adhesion molecules − Mus musculus (house mouse)
Drug metabolism − cytochrome P450 − Mus musculus (house mouse)
Metabolism of xenobiotics by cytochrome P450 − Mus musculus (house mouse)
Chemical carcinogenesis − DNA adducts − Mus musculus (house mouse)
Retinol metabolism − Mus musculus (house mouse)
Drug metabolism − other enzymes − Mus musculus (house mouse)
Toxoplasmosis − Mus musculus (house mouse)
Antigen processing and presentation − Mus musculus (house mouse)
PPAR signaling pathway − Mus musculus (house mouse)
Peroxisome − Mus musculus (house mouse)
Arachidonic acid metabolism − Mus musculus (house mouse)
Biosynthesis of unsaturated fatty acids − Mus musculus (house mouse)
Glutathione metabolism − Mus musculus (house mouse)
Platinum drug resistance − Mus musculus (house mouse)
African trypanosomiasis − Mus musculus (house mouse)
RIG−I−like receptor signaling pathway − Mus musculus (house mouse)
Chemical carcinogenesis − reactive oxygen species − Mus musculus (house mouse)
Herpes simplex virus 1 infection − Mus musculus (house mouse)
Hepatocellular carcinoma − Mus musculus (house mouse)
Fluid shear stress and atherosclerosis − Mus musculus (house mouse)
Chemical carcinogenesis − receptor activation − Mus musculus (house mouse)
Epstein−Barr virus infection − Mus musculus (house mouse)
B cell receptor signaling pathway − Mus musculus (house mouse)
JAK−STAT signaling pathway − Mus musculus (house mouse)
