Tg−ALF vs Tg−TRF
activated
suppressed
Viral myocarditis − Mus musculus (house mouse)
Intestinal immune network for IgA production − Mus musculus (house mouse)
Cell adhesion molecules − Mus musculus (house mouse)
Epstein−Barr virus infection − Mus musculus (house mouse)
Steroid hormone biosynthesis − Mus musculus (house mouse)
Hematopoietic cell lineage − Mus musculus (house mouse)
Leishmaniasis − Mus musculus (house mouse)
Primary immunodeficiency − Mus musculus (house mouse)
Glutathione metabolism − Mus musculus (house mouse)
Retinol metabolism − Mus musculus (house mouse)
Neutrophil extracellular trap formation − Mus musculus (house mouse)
Drug metabolism − cytochrome P450 − Mus musculus (house mouse)
Viral protein interaction with cytokine and cytokine receptor − Mus musculus (house mouse)
B cell receptor signaling pathway − Mus musculus (house mouse)
Chemokine signaling pathway − Mus musculus (house mouse)
Chemical carcinogenesis − DNA adducts − Mus musculus (house mouse)
NF−kappa B signaling pathway − Mus musculus (house mouse)
Peroxisome − Mus musculus (house mouse)
Osteoclast differentiation − Mus musculus (house mouse)
Metabolism of xenobiotics by cytochrome P450 − Mus musculus (house mouse)
Drug metabolism − other enzymes − Mus musculus (house mouse)
Leukocyte transendothelial migration − Mus musculus (house mouse)
Cytokine−cytokine receptor interaction − Mus musculus (house mouse)
PPAR signaling pathway − Mus musculus (house mouse)
Metabolic pathways − Mus musculus (house mouse)
Arachidonic acid metabolism − Mus musculus (house mouse)
Nicotine addiction − Mus musculus (house mouse)
Olfactory transduction − Mus musculus (house mouse)
Synaptic vesicle cycle − Mus musculus (house mouse)
Alcoholism − Mus musculus (house mouse)
